

DRIVER·RISK
MANAGEMENT

RECREATIONAL 4WD

Are you a first-time owner or user of a 4WD vehicle? Would you like to know more about your vehicle's capabilities and limitations, or enhance existing skills so you can safely operate a 4WD in off-road conditions?

Driver Risk Management's Recreational 4WD Training is a one-day course that focuses on enhancing the skills and knowledge of 4WD vehicle operations so you may confidently tackle off-road driving tasks as safely as possible.

The full-day training course is delivered within our purpose-built Driver Training facility, located at 16 Grogan Road Perth Airport, WA and consists of an in-class presentation, followed by a full-day of practical on-site activity. Participants will gain significant exposure to a variety of off-road driving conditions and situations, discussing obstacles encountered and learning appropriate solutions required to negotiate them safely. Driver Risk Management schedules courses to meet demand, usually once per month, on a Saturday or Sunday. Participants in this course are encouraged to supply their own vehicle for training and are welcome to swap drivers within your vehicle to share the experience.

Training will cover the following Topics:

- **VEHICLE FAMILIARISATION:**
A REVIEW OF YOUR VEHICLE TO HIGHLIGHT ITS FEATURES AND CAPABILITIES
- **RECOVERY EQUIPMENT OVERVIEW:**
WE WILL PROVIDE YOU WITH AN INSIGHT INTO DIFFERENT RECOVERY EQUIPMENT AND HOW TO USE IT SAFELY
- **RECOVERY TECHNIQUES:**
WE WILL DEMONSTRATE HOW TO RECOVER A VEHICLE USING DE BOGGING AIDS, EXHAUST JACK AND ASSISTED RECOVERY
- **GUIDANCE AND ADVICE ON TECHNIQUES FOR DRIVING OFF ROAD CONDITIONS**
